

USER GUIDE

- 1.) Install the plugin to your WP site, then activate it.
- 2.) After that navigate to Settings menu -> KeywordZon submenu to start configuring the plugin:

- 3.) On the KeywordZon settings page, enter the target keyword + your Amazon affiliate tag + select where the Amazon ads will be displayed. After that remember to click the Save Changes button:

WP KEYWORDZON

KeywordZon Plugin Settings

Product Keyword:

Your Amazon Affiliate Tag:

Placement Setting:

After How Many Paragraph:

[Save All Settings](#)

Setting Saved Successfully!

4.) Once your settings has been saved, then the plugin will display Amazon ads automatically on your WP Posts.

If you want to preview how it looks like, navigate to Posts menu -> All Posts. Then click “View” on any posts your website has.

And that’s all!

I hope the plugin works well and enjoy!
